## PREFACE

As part of its stated purpose to discover, preserve, and make accessible basic source material for research in the history of the United States, the Historical Records Survey has inventoried the archives of many churches of many denominations in Northern California. Although this work has been suspended because it is necessary to concentrate all efforts on the War assistance program, information gathered on vital statistics records in the churches has a direct value to the War Program.

In December 1941 the Director of the Bureau of the Census, Department of Commerce, expressed his appreciation of the Guides to Public Vital Statistics Records issued by the project in the states, and stated that guides to church vital statistics records also would be valuable to the War effort. Some sixty million American born people have no satisfactory proof of facts of birth; among them are thousands who wish to volunteer for service with the armed forces, and others who seek employment in war industries holding Federal Government contracts.

State-wide registration of births was not initiated in California until 1905, and before that time relatively few births were registered. At present, in the absence of a birth certificate a California born citizen can establish fact of birth only by superior court action at a cost of from fifty to one hundred dollars. However, legislation is pending before Congress to provide nation-wide for delayed registration of births. If such legislation is enacted persons will be able to obtain certified birth records by presenting satisfactory documentary evidence of American birth. Church records are considered very acceptable evidence, whether they be records of baptism, church membership, attendance, or Sunday school registration. It is hoped that this Guide to Church Vital Statistics Records will assist persons needing evidence of birth at present, and those who wish to establish proof of birth if the pending legislation is enacted, by locating for them their church records. The Guide will also serve persons having to refer to marriage and death records in order to prove family relationships.

Much of the information in this volume was gathered concurrently with the inventorying of church archives. All information was re-checked, and additional data were collected, in March and April of this year. As time did not permit complete field coverage, only denominations were selected for this Guide which had been almost completely covered in the original inventory. Wherever possible the exact location of the records has been indicated; in the absence of such information the reader is advised to enquire of the pastor.

For this volume field work in San Francisco was done by Fred G. Green, research assistant, under the supervision of Elinor J. Bauman, State project technician; in Alameda County by Maurice Buswell,

Max Clark, and John T. Robbins under the supervision of William McCann, district supervisor, and MerCiel Mason, research editor, who did the final editing of the manuscript. The index was prepared by Lillian E. Stearns; stencils were cut by Mary R. Keyes and Mildred Stille.

The Historical Records Survey expresses its appreciation to the pastors, church clerks, and church secretaries who gave interested cooperation to the compilers of the Guide.
